

## **GATEWAY INTERNATIONAL, LLC**

Co-sponsored By:  
**UF** UNIVERSITY of  
**FLORIDA**  
The Foundation for The Gator Nation  
COLLEGE OF PHARMACY

### **COURSE DESCRIPTION**

**COURSE: DIABETES: CONCEPTS, MANAGEMENT AND MONITORING**

ACPE #: **0515-9999-10-007-L01-P**

AN APPLICATION- BASED ACTIVITY

**CREDITS:** This program is accredited for 6 hours (0.6 CEUs) of Live CE Credit for pharmacists. You must attend the entire program and submit a completed Activity Evaluation Form to receive CE credit. Gateway International, LLC will mail Statement of CE credit to participants within 2 weeks following the completion of the Evaluation Form.

**DATE & LOCATION:** Saturday March 27, 2010: **Embassy Suites Hotel**  
200 Stoneridge Drive  
Columbia, SC 29210  
Tel: (803) 252-8700

**REGISTRATION:** \$79 prior to March 14, 2010  
\$119 after March 14, 2010

**AUDIENCE:** This course will benefit all pharmacists

**COURSE DESCRIPTION:**

This course will provide the pharmacist with the skills and knowledge to appropriately manage patients with diabetes. Participants will be able to provide evidence-based recommendations for medication management of diabetes and its related complications and comorbidities. Up to date in depth information on guidelines and medications will be covered. Practical information on how to assist patients with glucose meter selection and use will be provided in a hands-on workshop. You'll have the opportunity to utilize the information covered in the course in case studies reflecting common patient situations. Counseling points on diabetes, nonpharmacologic therapy and medications will be incorporated. Pharmacists in any practice setting will benefit from this comprehensive and practical review course to help you improve medical care for patients with diabetes. This course will meet the South Carolina requirement for 6 hrs. of Live CE for renewing your pharmacist license

## LEARNING OBJECTIVES:

- Discuss the pathophysiology and diagnosis of diabetes mellitus
- Develop an approach to the management of patients with diabetes based on current guidelines
- Provide recommendations on intensification of pharmacologic therapies based on individual patient parameters
- Discuss recent clinical trials and how they impact patient care
- Discuss recommendations for the prevention and management of diabetes complications
- Identify and manage co-morbidities associated with diabetes
- Select appropriate diabetes devices (e.g., glucose meters, insulin pens) for patients and educate them on their appropriate use

## GOALS:

This program will help the pharmacists understand the pathophysiology and diagnosis of Diabetes. It will also help them understand the treatment options currently available to treat this condition and help their patients with the selection of diabetes devices for home monitoring of their glucose levels.
